Republican Nominations

FOR PRESIDENT,
ULYSSES S. GRANT.
FOR VICE PRESIDENT,
SCHUYLER COLFAX.
VERMONT.
For Electors at Large—GEORGE W. GRANT, of Vergennes; H. FAIRBANKS, of St. Johnsbury.
For Elector—Third District—GEORGE WILKINSON, of Stowe.

To the Polls.

The result of the election to-morrow, which, perhaps, is as important as any that has ever taken place in the United States, is looked forward to with the greatest anxiety by the thousands upon thousands of people throughout the civilized world. The indications certainly are that the Republican standard bearers, Ulysses Grant and Schuyler Colfax, will be triumphantly elected, and upon their election depends the salvation of our country. The October elections have demoralized the Democrats, and the struggle they have been making since that time is only the struggle of the drowning man. Mr. Seymour has been making stump speeches at various points, but it seems to be generally conceded that he has not helped the cause which he espouses one particle.

It is expected that every Republican will do his duty to-morrow. None should stay at home unless compelled by sickness. Every vote is important and helps to swell the majority for the Republican nominees. Republicans should not only vote themselves, but should see that their luke warm neighbors, if they are so unfortunate as to have any, are provided with the right kind of votes. To the polls! Every man to the polls!

The Star that Never Sets.

In September, the Republicans of Vermont gave their State ticket a majority of about 30,000. We ought to do even better than this to-morrow. We ought to give Grant and Colfax a majority of 40 thousand, and this can be done by a little effort. Shall this effort not be made? We hope the Republicans of St. Albans and Franklin County will poll a full vote to-morrow. No Republican should stay at home. The State is sure for the Republican nominees, but this should keep no Republican from the polls. Let us suppose that two hundred Republicans in St. Albans should come to the conclusion that there is no necessity for their voting, as the State is certain to go for Grant and Colfax, is it not easy to see that our majority would be unreasonably small. Further than this, our opponents would proclaim that Republicanism is dying out in St. Albans. The Democrats will poll as large a vote as possible, and so should the Republicans. We want to have a good report from Franklin County Republicans. Let us not be disappointed.

New York Correspondence.

NEW YORK, Oct. 29.

We have another sensation in journalism to record. "Brick" Pomeroy's cheap evening paper—the *Democrat*—after an existence as such of about two months, has just been changed into a morning paper—name and price remaining the same—is avowedly in opposition to the *World*, which "Brick" accuses of treachery to the Democratic party, and of being the subsidized organ of the bond holders, and consequently, according to his view of the case, the enemy of the laboring masses.

The *Democrat* assumes to be the true representative organ of that party, and has declared its purpose toward the *World* to be "war to the knife" with the rank and file of the New York Democracy, recruited from the lowest ranks of social life. Pomeroy's paper is immensely popular, for nothing could exceed it in violence, bitterness, and gross personalities, and for all these the great unwashed have always and everywhere a huge liking. The *World*, however, shows no sign of trepidation as yet. It comes out day after day with triple sheet, as varied, as lively, and as vigorous as ever, and takes no notice whatever of the *Democrat*—which latter circumstance is what, perhaps, more than anything else, galls Pomeroy, for, to a sen-

sitive man, what is more exasperating than cool contempt?

Meanwhile, the *Tribune* is chuckling over the matter, and wishing success to "Brick" in his new enterprise, on the ground that he will do more than any other man in New York to open people's eyes to the true character of Democracy as it is. Of course, Pomeroy is left to appreciate the compliment just according to his own appreciation of its terms. The *Tribune* certainly has a shy way of sitting very hard.

The outrages which are being perpetrated in some of the Southern States on the White Unionists and freedmen by the KuKlux assassins and other desperadoes are producing a very deep impression on the minds of all right-thinking men as to the indispensable necessity, for the sake of great internal interests now seriously imperilled by reckless men—that Grant should be elected President. With the ignorant and unthinking, the cry of "negro supremacy" still has a certain sort of power, but recent developments in the South are fast producing the conviction, wherever there is intelligence and honesty, that the negro could not, after the close of the war, have been safely left without the protection of the ballot or protection of some other kind. These have materially contributed to the recent action of the War Democrats in coming out boldly as a body for Grant and Colfax, and they will doubtless have the effect of adding greatly to the splendid majority—the swelling popular tide—by which Grant will be borne to the White House.

Sensible men of all shades of politics here are now saying: "Such a state of things must be put a stop to; society in the South must be saved from the reign of terror with which it is threatened; and Grant is the man to do the work,—place him by all means where he will be in a position to do it effectually."

These assassinations and murders, reports of which are daily brought to us from the South, are producing the very opposite effect to that intended or hoped for by their dastardly perpetrators.

To pass from politics—one of the most significant events of the week is the action of the Protestant Episcopal Convention now sitting in this city, on the question of divorce. This question was brought up in the Convention last Saturday, and led to a very interesting discussion, in which Dr. Clark, of Connecticut, remarked that, in his State one-tenth of the marriages have been divorced, and in some places in Massachusetts and other States, he believed that the case was even worse. Dr. Stubbs, of New Jersey, said that he would rather suffer imprisonment or degradation than marry divorced persons.

Eventually the following resolutions, as reported from the committee on canons, was agreed to yesterday: "That no minister of this church shall solemnize matrimony in any case where a previous marriage of either of the parties shall have been dissolved for a cause arising subsequent thereto; provided that nothing herein shall apply to the innocent party in cases of divorce for adultery, nor to any cause where the prior marriage relation shall have terminated by the death of the husband or wife."

The discussion was largely attended by ladies, who appeared to take the deepest interest in the proceedings.

During the past week, the greatest excitement has prevailed in Wall Street, and the stock market was in a state bordering on panic yesterday. Erie declined to 38½, while other stocks showed signs of the effect of the demoralization. The proximate cause of this state of things is a severe monetary stringency, brought about by crafty speculators; but should the banks come to the rescue—as it is hoped they will—the pressure will soon be removed and affairs speedily resume their normal state. Meanwhile gold has fallen to 134½, and there is no apprehension of a decline in national securities while the prospects for "Grant and Peace" continue as good as they are at present.

Boston, Jan. 20, 1868.
POLAND'S WHITE PINE COMPOUND.—After having given it a thorough trial we can confidently recommend Poland's White Pine Compound as a very valuable article in the cure of colds, coughs, and pulmonary complaints generally. In several cases we have known it to give prompt relief when all other remedies had been tried and failed. It is an article, which in a climate so prone to sudden and severe colds as this of New England, ought to be in every family; and we are sure that those who once obtain it and give it a fair trial, will not thereafter be willing to be without it.

A VALUABLE MEDICINE.—Dr. Poland's White Pine Compound, advertised in our columns, is a successful article in the cure of colds and apply medicinal virtues of the White Pine Bark. It has been thoroughly tested by people in this city and vicinity, and the proprietor has testimonials to its value from persons well known to our readers. We recommend its trial in all those cases of disease to which it is adapted. It is sold by all our Druggists.—[N. Y. Jour.]

WOMAN.

FEMALES, OWING TO THE PECULIAR and important relations which they sustain, their peculiar organization, and the offices they perform, are subject to many sufferings. Freedom from these contribute in no small degree to their happiness and welfare, for none can be happy who are ill. Not only so, but to none of these various female complaints can long be suffered to run on without involving the general health of the individual, and ere long producing permanent sickness and premature decline. Nor is it pleasant to consult a physician for the relief of these various delicate affections, and only upon the most urgent necessity will a true woman so far sacrifice her greatest charm as to do so. The sex will then thank us for placing in their hands simple specifics which will be found efficacious in relieving and curing almost every one of these troublesome complaints peculiar to the sex.

HELMOLD'S EXTRACT OF BECHT.—Hundreds suffer in silence, and hundreds of others apply vainly to druggists and doctors, who either merely tantalize them with the hope of a cure or apply remedies which make them worse. I would not wish to assert anything that would do injustice to the afflicted, but I am obliged to say that although it may be prudent to consult a physician, the exhaustion of the powers of life, by laborious employment, unwholesome air and food, profuse menstruation, the use of tea and coffee, and frequent childbearing, is far oftener caused by direct irritation applied to the mucous membrane of the vagina itself.

When reviewing the causes of these distressing complaints, it is most painful to contemplate the attendant evils consequent upon them. It is but simple justice to the subject to enumerate a few of the many additional causes which so largely affect the life, health, and happiness of woman in all classes of society, and which, consequently, affect more or less directly, the welfare of the entire human family. The mania for coquetry, for procuring education and marriage, causes the years that nature designed for corporeal development to be wasted and perverted in the restraints of dress, the early commencement of school, and especially in the unhealthy excitement of the ball-room. Thus, with the body half-clad, and the mind unduly excited by pleasure, reverting in midnight revels the hours designed by nature for sleep and rest, the work of destruction is half accomplished.

In consequence of this early strain upon her system, unnecessary effort is required by the delicate votary to retain her situation in school at a later day, thus aggravating the evil. When one excitement is over, another in prospective keeps the mind unduly sensitive to impression, while the more constant nervousness of feeling induces, absolutely forbidding the exercise indispensable to the attainment and retention of organic health and strength; the exposure to night air; the sudden change of temperature; the colds and rheumatism, the excessive dancing, must, of necessity, produce their legitimate effect. At last, an early marriage cures the climax of misery, and the unfortunate one, hitherto so utterly regardless of the plain duties and responsibilities of her delicate nature, becomes an unwilling subject of medical treatment. This is but a truthful picture of the experience of thousands of our young women.

Long before the ability to exercise the functions of the generative organs, they require an education of the system, a system composed of what is called the tissue which is in common with the female breast and hips, evidently under the control of mental emotions and associations at an early period of life; and, as we shall subsequently see, these emotions, when excessive lead, long before puberty, to habits which sap the very life of their victims ere nature has self-completed their development.

For Female Weakness and Debility, Whites or Leucorrhoea, Too Profuse Menstruation, Excessive and Prolonged Periods, for Protrusion and Bearing Down, or Prolapsus Uteri, we offer the most perfect specific known: HELMOLD'S COMPOUND EXTRACT OF BECHT. Directions for use, diet, and advice, accompanying.

Females in every period of life, from infancy to extreme old age, will find it a remedy to aid nature in the discharge of its functions. Strength is the glory of manhood and womanhood. HELMOLD'S EXTRACT OF BECHT. is more strength giving than any of the preparations of Bark or Iron, and is more pleasant. It is a direct remedy for the most prominent physicians in the United States, is now offered to afflicted humanity as a certain cure for the following diseases and symptoms, from whatever cause originating: General Debility, Mental and Physical Depression, Indigestion, Determination of Blood to the Head, Confused Ideas, Hysteria, General Irritability, Restlessness and Sleeplessness at Night, Absence of Muscular Efficiency, Loss of Appetite, Dyspepsia, Enlarged Liver, Spasms, Deorganization or Paralysis of the Organs of Generation, Palpitation of the Heart, and, in fact, all the concomitants of a Nervous and Debilitated state of the system. To insure the genuine, cut this out. Ask for HELMOLD'S, take no other. Sold by Druggists and Dealers everywhere. Price \$1.25 per bottle, or six bottles for \$6.50. Delivered to any address. Describe symptoms in all communications. Address H. T. HELMOLD, Drug and Chemical Warehouse, 524 Broadway, New York.

None are genuine unless done up in steel engraved wrapper, with fac-simile of my Chemical Warehouse, and signed
